

LAB GROWN DIAMOND

GCAL LG320031697

January 18, 2022

4C's GRADING

Carat Weight **2.64**
Color **G**
Clarity **VS1**
Cut **8X**

Certificate No **GCAL LG320031697**
Identification **Lab Grown Diamond**
Shape and Cutting Style **Round Brilliant**
Measurements **8.90-8.92x5.44mm**
Fluorescence **None**
Girdle **Medium, Faceted**
Culet **None**
Inscription **LAB GROWN, GCAL 8X LG320031697**

ONE LOCATION. ONE STANDARD. GRADED IN THE USA

Gem Certification & Assurance Lab has examined this lab grown diamond and certifies that the specifications noted in this document are accurate within recognized gemological tolerances. GCAL is an independent third-party and stands behind our grading with a 4Cs Consumer Guarantee. The guarantee, grading scales and all images unique to this lab grown diamond are available at GCALUSA.com.

This laboratory grown diamond was created by the CVD (Chemical Vapor Deposition) method and has the same chemical, physical, and optical properties as a mined diamond. This diamond is Type II.

The fingerprint system for diamonds

Gemprint is the unique optical fingerprint of your lab grown diamond. This patented technology is positive, forensic identification.

Protect your investment by registering your lab grown diamond and receive discounts up to 10% off your annual insurance premiums. **Register your diamond at GEMPRINT.com**

Clarity Characteristics and Locations

Crystal Table, Upper Girdle
Pinpoints Throughout Crown

8X[™] is the ultimate achievement in precision diamond cutting. Only extraordinarily brilliant and beautiful diamonds achieve **EXCELLENT** grades in all **EIGHT** aspects of CUT quality assessment.

Optical Brilliance

is the overall return of white light to the viewer. It is measured to the thousandth decimal place and is represented in this image. The white areas indicate light return / brilliance, and the dark-blue areas indicate light loss.

Fire

results when white light travels through a diamond and is dispersed into its rainbow of spectral colors. These flashes of color contribute to sparkle and are best viewed as the diamond moves.

Scintillation

is the flashes of white light, or sparkle, produced when light is reflected from a diamond as it moves. This image shows the light returned from a single beam of light when your lab grown diamond is rotated in nine positions.

Optical Symmetry

is visualized in this photograph of your lab grown diamond taken in a specific colored lighting environment. The evenness of the pattern illustrates the precision and uniformity of facet shapes and alignment.

Hearts & Arrows

Precision faceting is visualized as Hearts & Arrows when round brilliant cut diamonds are viewed in specific lighting conditions. Each pattern is the result of superior facet placement and exact alignment.
