Gemprint®

is an identification system for diamonds that records the unique and subtle distinctions in diamonds, just as fingerprinting does for people. Completely noninvasive, Gemprint technology works by shining a low-powered red laser light at a diamond, which is refracted within the diamond and reflected from every facet and internal characteristic. The light coming back from the diamond is a distinct 'optical fingerprint' that is recorded and saved in a database that can be shared instantly among a global network of jewelers, law-enforcement and government officials. Gemprints can be matched and retrieved in seconds. As forensic evidence, Gemprint has been used by the FBI and the Canadian Government since its invention in 1976. Gemprint has the ability to detect simulants and discern the optical light performance of loose or mounted diamonds.

It's Important, Don't Wait Register Now

You must take this final important step to achieve the full security and insurance discounts of Gemprint. Register your diamond in the Gemprint® International Registry with your name and contact information so that in the event of your reported loss and subsequent recovery, you will be contacted. When you register your diamond, a unique account will be setup for you that will allow you to update your account online, report a diamond as lost or stolen, or transfer ownership of the diamond.

How to Register your Gemprint

This Certificate of Identification includes a Gemprint, now register your diamond in one of two ways:

- 1) Ask your retail jeweler or appraiser to register your diamond in the Gemprint® International Registry.
- 2) or Register your diamond at www.Gemprint.com.
(A registration fee applies.)

Three Reasons to Register Your Diamond's Fingerprint

1. Enjoy Peace of Mind
If you lose it. If it's stolen. If, if, if. Even if your diamond has been removed from its setting, a Gemprint® allows you to positively identify it, No more worry of tampering when your diamond is left to be repaired or cleaned.

2. Receive Insurance Discounts
Gemprint® is recognized by nearly all insurance companies as a safeguard for diamonds and many offer a 10% discount when your diamond is registered in the International Registry at www.Gemprint.com.

3. Protect Your Investment
Gemprint® is a court accepted means of irrefutable evidence proving ownership and protecting your investment. When stolen jewelry is recovered, the diamond's Gemprint® can be matched with the ID in the Lost and Stolen Database within seconds.
