252170199

252170200

*Comments: These man-made diamonds were grown in a laboratory by the CVD method, and have the same chemical, physical, and optical properties as a natural earth mined diamond. These lab grown diamonds are classified as Type IIa, which is the most chemically pure type of diamond, and almost or entirely devoid of impurities. Only 1-2% of natural earth mined diamonds are Type IIa, whereas, colorless and near-colorless CVD lab grown diamonds are usually Type IIa.
